Type some Sage code below and press Evaluate.

```
1 expression = "7*7/8"
2 result = "49/8"
3 mynumber = str( eval('49/8') )
4 show(html( "The result of " + expression + " is " + result + ", which is " + mynumber + "." ))
```

Evaluate

Language: Sage ▼

Share

The result of $7*7/8$ is $49/8$, which is 6.125.

Downloading TilEm

Installing TilEm on Windows

Download the [TilEm installer](#) (5.1 MB), unzip and run it.

- SHA256: f22aad40f0a5df1f3f074c438bde1e151225d2f8f6782ca8f09a18c4c20a0856d

Installing TilEm on GNU/Linux, Unix, or similar operating systems

Download the [TilEm sources](#) (2.4 MB).

- SHA256: fc27235a402a1bee36a15a6aa7c9003211fa5a1f8e1716310ca0f0b714743ad
- [Alternative download link \(ticalc.org\)](#)

You will also need [GTK+ 2.x](#) and [libicalcs2](#) (from the [TLP project](#)) installed. Note that these packages may be available from your OS's package manager; if so, be sure that you install the "development" (devel or -dev) packages as well.

Unpack the sources by running 'tar xfvj tilEm.tar.bz2', then compile and install TilEm by running './configure && make && sudo make install'. See the INSTALL file for more information.

TilEm is likely to work on Mac OS X, but we have not tested it. Please [let us know](#) if you can help us support TilEm on Mac OS X.

Library sources

[Source code](#) is also available for the various libraries used by TilEm. We recommend, however, that you obtain the latest versions of these libraries from their respective developers, if possible.

Older versions

You can download older versions of TilEm from [SourceForge](#)

Tilem is an emulator for the Z80 series of Texas Instruments graphing calculators. It supports all of the existing models in this series (TI-73, TI-76.fr, TI-81, TI-82, TI-83, TI-83 Plus, TI-84 Plus, TI-85, and TI-86.) Tilem features detailed emulation of all aspects of the calculator hardware, and includes a debugger for writing assembly programs.
